- Perfect for first time peel clients
- Cruelty-Free
- Safe for all skin types

FEATURED PRODUCTS

- Cake Cleanser
- Peach Peel
- Peachy Clean Neutralizing Masque
- Hyper-Friction™ Roll-On

RECOMMENDED RETAIL

- VR Spray
- Intimate Heart Sheet Masques

This 4 step system can be used for Pre and Post waxing maintenance. An at-home treatment to help gently exfoliate the skin, removing the outermost layers of dead skin cells revealing brighter smoother skin. This kit utilizes the new advanced technology of Dermal Sensory Correction™ which helps to restore reactive nerves by sending cellulare messages to calm and soothe the skin back to a normal threshold. These treatments complement other services in-between, such as waxing or our signature Intimate Brightening System to maintain results.

Protocol

1. Cleanse with **Cake Cleanser**. Remove with tepid water and pat dry.
2. Apply an even layer of **Peach Peel Solution** to front vaginal and/or underarm area. Leave on 4-6 minutes.
3. To neutralize peel apply a thin layer of **Peachy Clean Neutralizing Masque** (Neutralizer) on top of peel. Leave on approximately 5-7 minutes. Rinse with tepid water and pat dry.
4. For maximum results apply **Hyper-Friction™ Roll-On** everyday.

Suggested Tips

- This peel is gentle enough to be used monthly, either prior or post to our **Intimate Brightening System** or **V Collection**, to further enhance results.
- Continued use of the **Hyper-Friction™ Roll-On** will help to brighten, ease extractions, and hydrate the skin.
- Use **Intimate Heart Sheet Masque** after applying the **Hyper-Friction™ Roll-On** to further hydrate the skin. Once you remove the Masque you can rub in the excess essence. You can also leave it in the fridge for a cooling effect.

Contraindications

- ANY Waxing or Shaving 5 days prior or after service.
- Menstrual Cycle (Can be made 5 days prior to or after cycle).
- Pregnant or Lactating woman should seek Physician approval.
- DO NOT treat any open lesions, sores, or wounds.
- If you have a history of herpes simplex viral infections in the area being treated, you will need to take a prescription antiviral medication to prevent an outbreak. This medication should be started 3 days prior to the procedure and continued for 5 days post procedure.
- DO NOT use at the same time as our Intimate Brightening as it will cause over exfoliation, irritation, and hinder the results.

Active Ingredients & Benefits

Peach Glycolic Acid

A powerful antioxidant that helps to diminish hyperpigmentation and increase cellular turnover. All while also adding needed hydration to the skin.

Palmitoyl Tripeptide-8

Provides up to 72 hours of long-lasting hydration to the skin.

Prunus Persica (Peach) Gum

Aids in hydrating and smoothing the skin.
