

DESCRIPTION

BeeDazzle Mask delivers quality rejuvenation without fuss or downtime by uniting refinement and recovery in one unique formulation. Sensitive-friendly AHAs (mandelic and lactic) recondition skin's texture and complexion while bioactive Manuka Honey nurtures healing with anti-inflammatory, antimicrobial and conditioning effects.

BENEFITS

- Reconditions skin's texture and complexion
- Anti-inflammatory and antimicrobial
- Supports skin's barrier function
- Improves hydration

PRESENTATION <i>Pro:</i> 4 oz. Amber Jar with Spatula	SKIN TYPE All Skin Types – Not intended for use on ultra-sensitive or clients in treatment for serious illness	pH 3.5
---	--	-------------------------

USAGE

REFER TO BEEDAZZLE MASK PROTOCOL

CAUTION

Do not use on clients who have allergies to Almonds, Milk or Honey. Do not use on broken/cracked skin, sun-burned skin or cystic acne. Please check a Physicians Desk reference to make sure no issues with medications and ingredients. For external use only. Avoid contact with eyes. Keep out of reach of children. Product contains Alpha Hydroxy Acids (AHA). Use SPF for 2 weeks daily following application of this product.

INCI INGREDIENT LIST

Aqua (Water), Mandelic Acid (L), Glycerin*, Lactic Acid (L), Sodium Hydroxide, Xanthan Gum, Butylene Glycol, Honey (Mel), Mirabilis Jalapa Flower/Leaf/Stem Extract, Populus Tremuloides Bark Extract, Leuconostoc/Radish Root Ferment Filtrate, Lonicera Japonica (Honeysuckle) Flower Extract, Lonicera Caprifolium (Honeysuckle) Flower Extract, Zea Mays (Corn) Starch, Gluconolactone, Propanediol.

*organic

KEY INGREDIENTS

10% Mandelic Acid: chirally-correct form of the naturally occurring alpha hydroxyl acid (AHA) Mandelic Acid. Like other AHA exfoliants, Mandelic helps slough dead skin cells and assist cell turnover to help improve texture and complexion problems, such as wrinkles and uneven tone. What's unique about Mandelic is its ability to be as effective in treating mature skin conditions as Glycolic Acid but with significantly less irritation and redness, especially for those with sensitive or darker skins. With added antibacterial and anti-inflammatory effects, Mandelic is an ideal choice for a wider range of skin conditions and types looking for an improved appearance with fewer side effects.

Manuka Honey: when New Zealand bees harvest the nectar of the native manuka plant, you get the world-renowned Manuka Honey. In addition to having the highest antibacterial activity of all honeys, studies show it has unique proteins that enhance immune activity and stimulate anti-inflammatory response. Wounds treated with Manuka exhibit not only excellent recovery but also accelerated recovery. Other benefits of topical Manuka include antioxidant, humectant and protective effects.

5% Lactic Acid (L): chirally-correct form of the naturally occurring alpha hydroxy acid (AHA) Lactic Acid. Lactic is an exfoliant that helps reduce texture and complexion problems (such as wrinkles and uneven tone) by breaking down dead cellular buildup and assisting new cell turnover. Since it also has humectant properties, it supports moisture levels, thereby protecting dehydrated skins from becoming even dryer and more brittle. Of all the AHAs, Lactic Acid is generally regarded as one of the most gentle.

Mirabilis Jalapa Extract: also known as the "four o'clock flower", this delicate flower's extract is exceptionally successful at calming reactive skin, including reducing discomfort (like sensations of pain, itching and stinging) and visible redness; improves skin's long-term resilience against sensitivity triggers; supports skin's barrier function and improve hydration.
