

DESCRIPTION

Sensitive skin doesn't have to avoid exfoliants, it just needs to go with the right one: Refine Polish. Designed to stimulate skin's surface gently, leaving behind a smooth, clear and glowing complexion. Helping repair the barrier while calming the skin and reinforcing the microbiome, jojoba beads along with a gentle cleanser are a wonderful option for any skin type.

BENEFITS

- Calms sensitive and irritated skin
- Creates a more even toned skin for a youthful radiance
- Protects from the effects of environmental stress
- Supports and helps to repair skin's microbiome and barrier function

PRESENTATION <i>Retail:</i> 4 oz. Tube	SKIN TYPE All Skin Types (If client is ultra-sensitive, mix in small amount with Quiet Wash to make even more gentle)	pH 5.6
--	---	-------------------------

USAGE

Apply Refine Polish over cleansed skin in gentle circular motions once or twice a week. May also be mixed with Quiet Wash for more gentle results. Rinse well and gently pat skin dry.

CAUTION

Do not use if the skin is broken/cracked. For external use only. Avoid getting directly into eyes. Keep out of reach of children.

INCI INGREDIENT LIST

Aqua (Water), Jojoba Esters (Beads), Glycerin*, Cellulose Acetate, Propanediol, Cocamidopropyl Betaine, Leuconostoc/Radish Root Ferment Filtrate, Carbomer, Allantoin, Yogurt, Yogurt Extract, Pinus Cembra Wood Extract, Acetyl Heptapeptide-4, Acetyl Hexapeptide-49, Sodium Hydroxide, 1,2-Hexanediol, Panthenol (D), Polysorbate 20, Caprylyl Glycol, Tropolone, Sodium Gluconate, Butylene Glycol, Alcohol, Xanthan Gum, Pentylene Glycol, Citric Acid

*Organic

KEY INGREDIENTS

Pinus Cembra Wood Extract: concentrated extract of Swiss stone pine that calms skin hypersensitivity. It also helps to reduce local skin redness and color irregularities resulting from inflammation.

Acetyl hexapeptide-49: Peptide solution improves the discomfort of nagging pain and itch occurring in sensitive skin. Helps to restore the damaged barrier integrity. May also increase hydration allowing the skin to be more supple and soft.

Acetyl heptapeptide-4: Peptide that helps boost the skin's own defense system by promoting microbiota balance, diversity and an increase in beneficial bacteria and by improving the skin immune response and the physical barrier integrity. Heptapeptide helps to strengthen vulnerable skin by reinforcing and promoting optimum healthy microbiome skin barrier function, while helping prevent dehydration.

Yogurt: This probiotic is rich in protein, providing moisturizing properties that work to hydrate the stratum corneum. Yogurt helps to decrease trans-epidermal water loss, thus increasing the smoothness and softness of the skin. It is also contains antimicrobial and calming properties.

Jojoba Esters (Beads): Tiny natural Jojoba Beads provide gentle non-abrading physical exfoliation for the skin's surface to aid in the removal of debris and the unclogging of pores.
