

Incredible Enzyme with 7e Wellness Myolift™ Mini Microcurrent Device Treatment

FEATURES OF TREATMENT:

Incredible Enzymes along with a 7E Myolift™ True Microcurrent™ device is a powerhouse against lusterless, dull and sagging skin. It optimizes the skin's complexion on the surface and at the cellular level using a blend of botanical exfoliating enzymes and refinement assistants that work together to rejuvenate and repair tone and texture while brightening and clarifying the skin (pH 5.6). This treatment will brighten, lift, tighten and revitalize the skin.

7E Myolift™ True Microcurrent™ device can be used on clients of all ages and skin types. It is a natural, non-invasive method of delivering lasting skin health benefits. Microcurrent is often referred to as a non-invasive facelift because it re-educates facial muscle to tighten, tone and minimize fine lines and wrinkles. Microcurrent increases ATP, cellular energy to produce more collagen and elastin over time. Results are cumulative, so consistency and good skin care regimen is a must.

BENEFITS OF TREATMENT:

- Optimizes complexion on surface and cellular levels.
- Rejuvenates, exfoliates, and clarifies texture.
- Naturally lightens and evens skin tone.
- Diminishes the appearance of fine lines and other signs of aging skin.
- Tightens and tones muscles of the face.
- Promotes collagen and elastin growth.
